Deficit Spending Intrudes

The eightball rolled across the Board of Governors table, flashing the digits \$646,000. A disappointing but unavoidable sight, to be sure. The proposed preliminary operating budget approved for 1984-85 provides for total revenues of \$223,169,000, and net expenditures (after the deduction of \$1,400,000 for estimated under-expenditures and income improvement) of \$223,815,000.

The regular operating grant from the provincial government held no increase for either growth or inflation. There were a few rays of sunshine, however. The base grant includes funding for the Extended Practicum program run by the Faculties of Education and Saint-Jean. Recognition has also been given to the operating costs of the new Business Building and the University space in the Mackenzie Health Sciences Centre. An additional \$7,075,700 was provided for growth-related purposes with no commitment for subsequent years.

The proposed budget went before the Board on 8 June. Earlier, in a submission to the Board's Finance Committee, Vice-President (Finance and Administration) L.C. Leitch urged that the \$646,000 deficit be approved because "to require further cuts in unit budgets at this time would be difficult in the extreme, and would do irreparable damage to the morale of a University community that has sustained successive cuts for a number of years in the face of steeply rising enrolments.

"The rate of growth in enrolments (to an estimated 23,600 full-time students) is expected to be down as a result of the imposition of a general quota and the raising of the admission average to 65 percent. Fee revenue also reflects the decision to increase tuition by 7.6 percent effective 1 September 1984."

The Budget Adjustment Fund, Mr. Leitch pointed out, is, for all intents and purposes, the only vehicle for resource reallocation within the University. "Because of the significant pressures on certain Faculties and support units, primarily related to growth and shifting enrolment patterns, it is recommended that \$1.34 million be provided for this purpose in 1984-85."

Another \$102,000 will be set aside for allocation at the discretion of the President.

According to Mr. Leitch, a front line task during the next three years is to eliminate the cumulative deficit and begin to restore operating surplus to the level prescribed in Operating Budget Principles and Policies.

Educational Affairs

Janet Bentley, Chairman of the Educational Affairs Committee, asked the Governors to endorse a proposal "for the establishment of a child health research centre in connection with the University of Alberta, it being understood that the capital and operating budgets will be fully funded from external sources; that further details will be forthcoming as developed by the Joint (University/Northern Alberta Children's Hospital Foundation) Committee, and that the building will be considered in conjunction with other new facilities for medical research."

Discussion centred on the future role of the Joint Committee, with agreement that planning for the proposed centre should be integrated into the over-all University planning process. The motion was carried unanimously.

Governors also supported the continuation of the annual conference "Canada, the World and the Future,"

subject to a detailed evaluation of the conference in the fifth year (1988-89).

Mrs. Bentley informed the Board that two new department chairmen have been appointed: P.J. Cahill will begin a three-year term as Chairman of Religious Studies on 1 July; W.B. MacDonald took over as Chairman of Anaesthesia on 1 May. His is a five-year appointment.

Reports from the Chairman, the Chancellor and various constituent groups represented on the Board followed. (Mr. Savaryn reported that with the growing number of graduands, serious thought is being given to the possibility of holding two Convocations a day next spring. He also said that the Senate finished the 1983-84 year with "a modest budget surplus.")

In his first Report as President of the Students' Union, Floyd Hodgins informed the Governors that the Students' Union is organizing a "Festival of Education," to be held Friday, 29 June, at 2 p.m. The afternoon event is geared both to current University students and prospective students. Those invited to take part include the Hon. Dick Johnston, the Hon. Dave King, and L.C. Leitch. Mr. Hodgins encouraged all members of the Board to attend.

At the conclusion of the meeting, Mr. Schlosser paid special tribute to Brian Silzer who leaves his post as Administrative Director of the Board at the end of June. He will assume the position of University Registrar 1 July. □

The Not So Ugly Academic

On 5 June, George Baldwin, Vice-President (Academic), presented the following Report to Convocation.

The usual thing in a Report to Convocation is to survey the academic year for its highlights and single out for special attention an issue of major concern or interest.

There is no question what that would be for 1983-84—the decision to roll back our freshman intake from an anticipated all-time high to the level of 1982-83, so as not to place an intolerable burden on those Faculties unprotected by quotas as enrolments build up over the years to graduation.

All sorts of important questions attend that decision—from whether or not circumstances in fact justify it, as claimed, to the very right of public institutions to make social policy with-

out government sanction.

Were this for me simply another Spring Convocation, one among the many I have attended since coming here in 1951, I would undoubtedly have made that my text, and you would have heard about the trauma that this year has been for your University as it wrestled with the powerful contrary pulls of accessibility for new students and academic responsibility to the students we already have.

In the end, there really was no choice: we were not about to debase our currency any further through a failure of nerve.

Developing that theme would have allowed me to say something about the essential character of great universities when they are being true to

themselves, above all when they are being tested, as they express through their actions their commitment to the things that matter to them most.

But this is for me personally a very special convocation, a leave-taking, and I therefore think I will use it not to talk about this past year in particular (because our surface is very nearly always choppy with major issues), nor about the University as an age-old institution with its own categorical imperatives that must be obeyed if we are not to betray it (because our depths are not properly sounded in brief remarks such as these), but about the kind of people who typically make up the professoriate and who have therefore defined my space for over three decades.

There is not of course one kind of university person: we probably have our statistical share of rogues, saints, deadbeats and heroes. But we also have, I believe, certain shared attributes that can be detected from time to time by anyone interested enough to keep watch on the academic at work and at play.

One such attribute, not among the most attractive, is a certain intellectual pride or arrogance born of knowing the absolute truth and being its prophet, invited or not. A favorite T-shirt on campus reads, "I'm known far and wide for my humility."

page two, Folio, 21 June 1984

The paradox is that this superbity, the by-product of academic achievement, is in fact often accompanied by genuine humility—most often in the presence of excellence, especially where ideas are concerned.

One form that takes where important things are concerned is a reluctance to generalize or be simplistic. Ex-Professor Lester Pearson in the end revealed a fatal flaw: he could see both sides of a question too clearly, and that can incapacitate a politician, who must surely above all believe in his causes absolutely. Diefenbaker never had any trouble: he was a lawyer; probably could have been an accountant. But the academic is trained to split hairs with fine distinction; peel an idea down to its core and chew on that; and—like Jack evading the Giant's patty-cake—leap from one hand to the other to avoid being pinned down.

There is something almost (though not quite) endearing about his readiness, on the one hand, to yield a point in the classroom to a bright student who has scored and, on the other—a second attribute of my Ugly Academic—his bullheaded commitment to principle, especially (say) at Home and School meetings, where he is often a bore and embarrassment to all normal people, especially his family.

It is not without good reason that President Max Wyman used to say professors all believe they are self-employed. Where academics are concerned, universities are like armies without Other Ranks; and (my third distinctive mark) very nearly everything is a target for their intellectual sharpshooters.

Except for one thing—and this is the point to it all: where *excellence* is concerned, the arrogance of the academic turns into something very like reverence. Everything is in the service of that, including his (or her) huff and puffery and principled posturing, cynicism and nay-saying, apparent non-conformity and dissent.

These are the restlessness of the devotee waiting for a sign. When that sign is forthcoming—in student or mentor or colleague, in the classroom or laboratory or studio, from a book read, procedure observed or performance attended—then this place is at its magical best.

Then your academic is not so ugly after all; and if you pay close attention to the look in his eyes when

the magic is working, you will learn something of why people give their lives to the pursuits of a university—to academic study, to the preservation of what that reveals, and to the transmission of it to others willing to listen.

The cardinal princes of this particular church—though not, it should be said, identifiable by their robes—do nevertheless stand out from among the rest of us, as they should—by virtue of their pre-eminence as scholars or teachers or both. But the commonality in a university are readily touched by their greatness, more so I think than in other places.

And that, for me, is what has made it all worthwhile—the play of exploratory wit among my colleagues, the delight in something worth trying,

the sometimes passionate dedication to finding out how things work, the selfless—occasionally sacrificial—pursuit to conclusion of a job once begun—all of this in the company of people who for the most part consider themselves fortunate, in service to society, to be doing what they value and enjoy most.

This is what the community of scholars has going for it as a place to work—an oft-renewed sense of satisfaction in doing a job well. If we want the best from our University, it is absolutely vital that we provide the conditions that will allow that process to continue; for, although the academic may be difficult to love, it is in my view essential to our society that he be cherished. □

Faculty of Science Places Onus on Communication

Gerry Moss, Professor of Physics, has been named as the Faculty of Science's first Associate Dean (External Relations). In making the announcement, John McDonald, Dean of Science, stated that it is an appointment that speaks to the realization that "we have to do more than teach students. We have to tell people more about what science is all about."

With 13 departments, 350 staff members and more than 4,000 students, the Faculty of Science is the largest in the University, Dr. Moss points out. "The aim of our office will be to make the Faculty and its members better known. And that includes learning more about ourselves." Dr. Moss states that one of his early priorities will therefore be the building of a solid data base, an annotated research inventory that can be used to communicate the Faculty's many initiatives to its various audiences.

Stressing that he does not intend to "re-invent the wheel," he explains that his office will rarely act as a direct link to the outside world, but rather as one that works closely with those in such offices as Community Relations and the Registrar. His mandate is a broad one, and, in some senses, still loosely defined. His priorities will include:

- establishing and maintaining strong media contacts of special interest to the Faculty;

- coordinating and disseminating information about all aspects of the Faculty;
- strengthening student programs; and
- advising on teacher training.

Dr. Moss is no stranger to the world of communications. He has written a science column for both the *Edmonton Journal* and the *Ottawa Citizen*. He has contributed to *Environmental Views*, a bimonthly magazine published by Alberta Environment. Starting this fall, he will broadcast weekly science commentaries on CKUA.

A native of Milwaukee, Dr. Moss is a graduate of the University of Wisconsin (BSc 1961) and the University of Oregon (PhD 1966). Since coming to this University in 1969 his research efforts have focussed on experimental observations of spin-dependent effects in few nucleon systems at intermediate energies using the TRIUMF lab in Vancouver. He is currently working on experimental tests of basic conservation laws in nucleon-nucleon interactions.

An active member of the AAS:UA (both on its Council and its Executive Committee), Dr. Moss was a representative of the Faculty of Science on GFC from 1978 to 1981. He has served on several Physics Department and TRIUMF committees. His position as Associate Dean (External Relations) will be a half-time appointment, for an indefinite period commencing 1 July. □

For Willard Allen, the 'Chemistry' Was Right for a Fruitful Career

It's 1948. The war is over; the veterans are home, crowding the work force. Oil has put Leduc, and Alberta, on the map. And the University of Alberta has set up shop in Calgary.

This was the scene when Willard Finley Allen, son of a University of Western Ontario physicist, joined the many "post-Leduc carpetbaggers" and moved west. At 24, with three degrees to his credit, the Ontario native took "just about the only appropriate academic job in Canada," teaching chemistry to education students at the University's Calgary campus. Now, as the Associate Vice-President (Finance and Administration) prepares to depart academia and administration, he has little hesitation in describing his years on campus. "Taking the bad with the good, I wouldn't trade my career for any other."

Dr. Allen has been involved in teaching, research and administration for more than 35 years. His move to Edmonton came after nine years in Calgary, working "in an old air force hut that froze your toes." In 1957 he filled in for Walter Harris who was off to Chalk River. It was a good year and, when asked to stay on, he accepted. Chemistry had a new recruit.

He looks back on his days in the classroom as "the most consistently satisfying" of his long career. From the intimate classes of the embryonic Calgary campus to the challenging labs and seminars of his graduate students, the atmosphere of intellectual excitement, the pleasure of helping students discover, and the vicarious enjoyment of it all clearly mattered. "There are many things I've done here that could be described as exciting yet not particularly rewarding," he summarizes. "Teaching was always both."

As his field of vision expanded, so did his influence on campus. Almost immediately upon becoming a member of the AAS:UA executive he became involved in the "first really big tenure case" that the University had to face. ("It was the first time in my life that I heard my colleagues refer to each other as Stalinists and Trotskyites," he recalls with a bemused look.) His participation in that experience led him to the Presidency of the AAS:UA (1966), and to his active role in establishing new tenure pro-

cedures. In 1969, while serving as President of the Canadian Association of University Teachers, he had to deal with the "Simon Fraser affair."

His sensitivity toward the concerns of academics at this University and across the country led him to University Hall in 1971 as the University's first Associate Vice-President (Academic). "He was a most distinguished President of CAUT," recalls Henry Kreisel, then Vice-President (Academic). "He was known throughout the academic community as a man of integrity, a man who didn't make judgments lightly. He was a man whose counsel I always valued."

In 1974 Dr. Allen made a difficult decision, that of relinquishing his teaching load. "It became apparent that my increasing administrative responsibilities meant that I could no longer do justice to my students," he recalls. "But teaching was not something I gave up easily." While his early focus as Associate Vice-President was the Tenure Appeals Committee, Dr. Allen also took on responsibility for a wide range of service-oriented departments. Radio and Television, Native Studies, all Institutes and Centres, the Registrar's Office, Faculté Saint-Jean, and Extension were all, at one time or another, under the watchful Allen eye.

Were tellers' green visors still in vogue in 1980 it might well have been appropriate for Dr. Allen to pick one up. That year he moved across the hall into the office of the Vice-President (Finance and Administration). Since then, he says with a wry grin, it's been "budgets, budgets, budgets." In fact, he admits to the oversimplification in that description of his work of the past four years. Computing Services, the APO Committee and numerous other *ad hoc* committees have benefited from his input. Says Lorne Leitch, "Willard Allen has served his University and his profession with distinction for more than 35 years. His wise advice and counsel will be sorely missed."

When asked about highlights, Dr. Allen responds thoughtfully: "Teaching, of course; and knowing that I've been able to do some things that have helped improve the quality of University life." He cites his part in the es-

tablishment of Faculté Saint-Jean and his role in the achieving of Faculty status for Extension as contributions that have made a difference. And then there were the many involvements that he describes as "not exactly satisfying, but ones that certainly got the adrenalin going."

Dr. Allen's future should prove most satisfying. He has his sights set on Victoria; but first, he and his wife will take an extended holiday. Proud owners of a new "fifth wheel," they will travel the continents, visiting friends, haunting art galleries and mu-

seums, getting to know the world at a leisurely pace. "Whatever I do after that is not likely to have much to do with universities or chemistry. But I hope that it will be worthwhile, that I can contribute something, and that I can enjoy myself at the same time."

What will he miss? "The people. For me, a University is people and ideas. All the rest is filler. I can take the ideas with me...but not the people." Will he keep in touch? "Sure. I'll even ask to be put on the *Folio* mailing list." □

Faculty of Arts Presents Undergraduate Teaching Award

On 23 May, prior to the beginning of its formal business session, Bernard Rochet, Department of Romance Languages, was presented with the Faculty of Arts Undergraduate Teaching Award. Professor Rochet had been nominated from among his colleagues and the selection was made by a senior faculty level committee. A brief profile follows:

"Dr. Rochet has very high expectations and a knack for making the student want to meet them." This comment, taken from a course evaluation form, exemplifies student perceptions of Dr. Rochet. A challenging and inspiring teacher, he represents perhaps the ideal blend of teaching and research that should characterize a university teacher.

Dr. Rochet is a leader in the development and use of computer-assisted instruction in the language field. He has completed three units on PLATO dealing with French phonetics, two of which use audio material and are designed to teach sound discrimination to anglophones. A fourth unit, now in preparation, will use synthetic material as the basis for "adapting" English speakers' perceptions of voice onset time in French consonants. On MTS, Dr. Rochet has developed a program which can be used both as an electronic pronunciation dictionary of French and as an instructional tool. In the latter capacity it can handle any string as

input, enabling students to enter whatever French words they choose, test their predictions against those of the computer, and obtain a display of the deviation for each item.

Dr. Rochet has written two textbooks: *French Phonetics* (323 pp.) was developed for the department's basic service course in linguistics: R LIN 372. *The Structure of Canadian French* (161 pp.), which was developed for R LIN 474, constitutes a detailed analysis of the vocabulary, morphology, syntax and sound system of Canadian French. It is used in conjunction with sound tracks from films of the National Film Board and recordings of interviews with informants from St. Paul, Bonnyville, Quebec, Acadia, and related European French dialects. In 1984-85 a computerized library of the plays of Michel Tremblay will also be made available to students, who will use the Oxford concordance Package to study the characteristics of *joual*.

Dr. Rochet joined the Department of Romance Languages in 1970. He is a respected scholar in historical and sociolinguistics, and is very active in graduate teaching and supervision. Since 1976, he has been Associate Chairman and Graduate Student Advisor for the department. His greatest enthusiasm, however, continues to focus on the introductory undergraduate courses in his field and the challenge of increasing their effectiveness. □

Canadian Impressions: A National Print Exhibition

In spite of the current economic downturn, exciting projects continue to be realized by people who are willing to work cooperatively and creatively together. One such project is "Canadian Impressions." It is an exhibition, national in scope, which consists of 51 works by 15 Canadian printmakers. It left Edmonton for Tokyo on 14 June, a mere eight months after a letter was received from the Osaka Centre of Contemporary Art offering a time slot for a Canadian Print Show in July and August of 1984.

"Canadian Impressions" is being supported by Canadian Pacific Airlines, Alberta Culture, the Canada Council and the University of Alberta. A not insignificant part of the project has been personally supported by the individual members of the organizing committee who all felt that the opportunity to send such a show to Japan was just too good to miss. Helen Collinson, Liz Ingram, Walter Jule and Lyndal Osborne formed the first committee that decided to meet the request from the Osaka Centre of Contemporary Art. There was, of course, very little time and, as usual, no money at all. On the plus side of the ledger, however, was optimism, commitment and, perhaps, a touch of madness.

Although the show was put together quickly, these projects seldom happen out of the blue but are, rather, the end result of long, slowly built, and often very close relationships between individuals and institutions in other countries. As long ago as 1976, when Walter Jule first travelled to Japan, the seeds of possible cultural exchanges were sown. At that time, he met Japanese printmakers, art educators and gallery personnel.

In 1978, following a sabbatical year in Japan, Professor Jule arranged an exchange exhibition featuring student work from Osaka University and the University of Alberta. The prints from Canada were sent off to Japan in mailing tubes and the show was presented there first. The Japanese component was added for the trip back to Canada. The show, complete with catalogue, was successfully shown at the Ring House Gallery and travelled in Canada before being dismantled.

The continuing interest in artistic exchange received a further boost with the visit of Japanese artist Shoichi Ida who came to teach at our University for a summer session. He was excited by the calibre of our contemporary Canadian prints and he felt that the Japanese people, who have such a long and distinguished tradition of printmaking, would welcome the opportunity to see Canadian work. It was after Ida's return to Japan that the invitation to send a National Exhibition to Osaka's Contemporary Art Centre was received by Walter Jule.

The organizing committee invited the participating artists to send slides and the show was chosen from the slides by a slightly expanded committee which included Bill Preshing, Vice-Chairman of the Alberta Art Foundation, and Ross Bradley from Alberta Culture. The result is an exhibition of great variety. Both small and large scale pieces are included and the range of media includes etching, lithography, screen-printing mixed media as well as several exciting woodcuts. Three dimensional works are also included.

The artists who are represented include Serge Tousignant and René Derouin from Montreal. The latter is represented by a massive, seven-panel woodcut called "Nouveau Quebec," each panel of which is 40 by 90 inches. John Will and Margaret May from Calgary have each sent four works, as have Liz Ingram, Karen Dugas, Walter Jule, Lyndal Osborne and Richard Yates from Edmonton. Jennifer Dickson from Ottawa has contributed four etchings and Carl Heywood from Kingston has sent three etchings. Otis Tamasaukas, also from Kingston, has sent three works, one etching and two prints which combine lithography and etching. Barbara Ziegler-Sungur from Vancouver has sent an intaglio print and two works of lithography and screen-print. The two three-dimensional pieces have been contributed by Richard Sewell of Toronto.

Care was taken to try to organize an exhibition that was coherent as a single statement as well as to send to Japan a wide variety of work to which the viewers could relate. It was felt that it was very important to send a

sufficient number of works by each artist so that some kind of rational reaction could be made by the Japanese public. We wanted to send work that was current and therefore none of the work in the exhibition dates from before 1980. Most of it has been produced within the past year and a half.

The organizers hope that this

project will reflect well on the University of Alberta, and that members of the University community and the citizens of Edmonton will have an opportunity to see the exhibition after the completion of its Eastern tour.*□

**This article was contributed by Helen Collinson, Director of University Collections.*

University Aerobics Goes Video

In the beginning there was "Jane Fonda's Workout." Then came "Everyday with Richard Simmons" and a plethora of other celebrity-hosted fitness video programs. Now, fresh from the hopper, we have "U of A Aerobics."

The video, the first of its kind in western Canada, is designed for experienced exercisers. The 45-minute workout features Michelle Polanski, aerobic dance instructor and choreographer of the program, and several University people enrolled in aerobic dance classes.

Under the directorial eye of Keith Barbutza, Physical Education and Recreation, the video took a gruelling three days to film at the local AC-

CESS studios. Staff Fitness and Lifestyle Program Coordinator Art Burgess acted as executive producer of the program.

The video was produced as a result of requests for a take-home resource. Participants in aerobic dance, devotees all, wanted to remember the fast-moving routines they are led through each day. At home, without the right music and enthusiasm of an instructor, it was difficult to recreate the workout.

Color video tapes in either VHS or Beta are available through the Department of Athletic Services, Campus Recreation Office, for \$39.50. For further information, call 432-5607.□

Medicine Strikes Committee for International Exchanges

The Faculty of Medicine has established a Committee for International Exchanges. Under the chairmanship of R.H. Wensel, the committee will act as the Faculty Centre for Information and Advice concerning exchanges of academic staff, residents and students with other medical schools and hospitals outside Canada.

The five-member committee will also advise the Dean on the appropriateness of any proposed programs and hold responsibility for ensuring that all visiting faculty, graduate students and students who are taking part in a recognized exchange program, are "properly and appropriately cared for during their stay in Edmonton."□

New President for Shastri Indo-Canadian Institute

At its recent meeting, the Board of Directors of the Shastri Indo-Canadian Institute elected H.G. Coward, Department of Religious Studies, University of Calgary, to the Office of President.

H.P. Srivastava, Department of

Geography, University of Ottawa, succeeds Balbir S. Sahni, Department of Economics, Concordia University, as Resident Director in New Delhi, India, and he will assume the duties of that office as of 15 July.□

It was smiles all around on 30 May when members of the University community met with government officials in the Legislative Office of the Hon. Bill Diachuk, Minister responsible for Workers' Health, Safety and Compensation. While R.S. Fraser, Acting Dean of Medicine, looks on, Mr. Diachuk presents a cheque for \$245,000 to President Horowitz. The matching grant will contribute to the establishment of a Chair in Occupational Health.

Chair Established in Occupational Health

Once again, the cooperative effort of industry, government and the University has paid off. And the Faculty of Medicine is the better for it. An endowment fund and a matching grant from Alberta's Occupational Health and Safety Division mean that the University can now establish a Chair in Occupational Health.

The endowment fund was established by Neil Reimer, National Director of the Energy and Chemical Workers' Union, to provide a secure funding base for research into occupational health problems. Four Canadian firms contributed: Shell Canada Ltd.; NOVA, An Alberta Corporation; Celanese Canada Inc.; and Petro Canada. Together they raised \$245,000. Under the terms of the government's Heritage Grant Program, that money was matched, and the resulting funds earmarked for "the development of a highly sophisticated research program in occupational health."

The new Chair in Occupational Health will be a part of the Medical Faculty's Department of Health Services Administration and Community Medicine. Tee Guidotti, currently head of the Division of Occupational and Environmental Health at San Diego State University, will assume

the Chair 1 September. His responsibilities will include initiating and conducting research activities; providing consultant services to industry, labor and government; and developing an occupational health curriculum that focusses on current problems facing the profession. Dr. Guidotti, who describes his new position as "the most exciting professional opportunity in the field in North America," hopes to develop a research agenda focussing on toxicology and epidemiology. □

'Friends' Doing Collections a Good Turn

Effective 1 March 1984, the Friends of the University of Alberta Museums was incorporated under the Societies Act of the Province of Alberta.

The organization will give interested individuals the opportunity to become more intimately involved with the various collections on campus. Interesting volunteer work can be had in the areas of research, documentation, various departmental collections, writing of articles for the newsletter, and docenting, to name just a few. A bookstore is also a possibility in the near future. It is hoped that the activ-

Visions of Eight to be Realized

Eight enterprising individuals have attracted monies from the University/Community Special Projects Fund.

Carolyn Yewchuk, Educational Psychology, received \$3,000 toward capital and operating costs for two programs for gifted children between the ages of 8 and 13. The programs deal with self-awareness and the pursuit of individual interests.

Sandy Susut, Extension, was awarded \$9,000 for the purchase of resource materials, art work and signage for the new Women's Resource Centre, to be located in a refurbished house in North Garneau. The Centre, to be operational by September, will be an expansion of the current Centre in Extension. It will contain recent books and publications for use by staff, students and the public.

University Collections, under the direction of Helen Collinson, was given \$2,500 toward the purchase of a J.B. Taylor painting. Mr. Taylor, a member the University's Art Department for many years, was a highly regarded Canadian artist.

Roslyn Madrid, Anthropology, received \$4,400 for computing funds to convert the catalogue and documentation of archeological and cross-cultural collections/artifacts to SPIRES.

Nick Kach, Educational Foundations, was granted \$2,000 interim funding (operating) to publish the *Canadian Journal of Native Education*. It deals with issues concerning native education and is published three times a year.

Robert Stangeland, Chairman of the Department of Music, supervises the offering of some 200 concerts and recitals to the public every year. The sum of \$5,000 will enable those to be better publicized.

Funding of \$8,530 will allow Randy Currah, Devonian Botanic Garden, to continue research for his publication *Alberta Wildflower Compendium*. The book will contain information concerning the wildflowers which are able to grow in the province.

Jim Parker, Archivist, will design and prepare a display for Faculté Saint-Jean to be taken to Grande Prairie for the fall Senate meeting. The display will outline the historical aspects of the Faculté and emphasize what it can offer the people of Alberta. □

Selection and Review Committees

The GFC Nominating Committee is seeking nominations to fill vacancies for one faculty member, not a member of the department concerned, to serve on the following selection and review committees.

Selection Committees for Chairmen of:

The Department of Anatomy
The Department of Medical Microbiology
The Department of Obstetrics and Gynecology

Review Committees for Chairmen of:

The Department of Medicine
The Department of Biochemistry
The Department of Pathology
The Department of Psychiatry
The Department of Surgery
Those who have suggestions for nominations, or who are interested in serving on any of the above, are invited to contact Mrs. P.M. Plaskitt, Secretary to the Nominating Committee, 2-5 University Hall, 432-4715, not later than 26 June.

What is an effective way of bringing ex-Deans together? The Faculty of Agriculture and Forestry found that the 13 June opening of the new Plant Science Field Facility at the University Farm had magnetic qualities. Fenton MacHardy, John Bowland, Art McCalla, and current Dean Roy Berg (left to right) chatted it up after R.E. Phillips, Vice-President (Facilities and Services), brought a sickle down on the official opening ribbon.

University of Alberta International Development Register

The President's Advisory Committee on International Development invites faculty and staff with experience/interest in international development to lend their expertise to the Register.

A publicly available data bank, the Register lists about 400 individuals at Alberta universities who have lived and worked for three months or more in countries other than Canada, the United States, and those of Western Europe. Each person listed is asked to update his or her section on an annual basis.

Other faculty and staff with similar interests and concerns can be consulted readily. Referrals to people listed in the Register allow Alberta universities to respond quickly and effectively to enquiries about international development.

You can search Register data by signing on to your MTS account and entering the command \$LIST PCI3:DINT.DOC. To run the program, simply enter \$RUN PCI3:DINT.

For further information or to join the Register, contact:

International Development Register
3-20 University Hall
University of Alberta
Telephone 432-5660

people

Norbert Morgenstern (Civil Engineering) was the recipient of the Centennial Award of the Association of Professional Engineers, Geologists and Geophysicists of Alberta at their recent annual meeting. The Centennial Award is the most prestigious of the Association's awards and is presented to "a member who has attained unusual distinction relating to the sciences of engineering, geology or geophysics; in the teaching of these fields, or who by reason of invention, research, original work, or as an executive on projects with unusual or important scope, has made substantial contributions to the foregoing fields."

Georgina Lewis (Humanities and Social Sciences Library) and John Charles (Bruce Peel Special Collections Library) participated in a Canadian Studies conference held at Duke University, Durham, North Carolina, 23 to 25 May. The conference was entitled "Ethnic Mosaic in Canadian Studies: Other Tiles." Ms. Lewis addressed the topic of "Ethnic Resources for Teaching and Scholarship at the University of Alberta," while Mr. Charles spoke on "Rare Canadiana and Western Canadian Literature in Special Collections." The two librarians also visited the University of North Carolina at Chapel Hill, as well as Greensboro, to learn about resource sharing and cooperative collection development among North Carolina's academic libraries.

Campus Reviews

As part of the process of carrying out systematic reviews under the guidance of the President's Advisory Committee on Campus Reviews (PACCR),

the Department of Educational Foundations is completing the self-study phase of the review process. The other major phase of the process is the site visit and assessment by the Unit Review Committee. In preparation for this second phase, PACCR invites written comment prior to 8 September 1984. Submissions are for the use of the Unit Review Committee and will be held in confidence by the members of that committee.

Submissions should be sent to: Mrs. L. Pearson, PACCR Office, W4-13 Chemistry Building. Attention: The Educational Foundations Unit Review Committee.

Scholarships, Fellowships and Awards

Sandra Garvie Memorial Fund

Value: Up to \$1,500. **Number:** At the discretion of the Board of Directors. **Frequency:** Annual.
Purpose: To provide funding to any individual wishing to pursue a course of study or research relating to the Library or information aspects of public legal education. **Conditions:** (1) Applicants must be Canadian citizens or landed immigrants; (2) Awards will be based upon financial need and suitability of the proposed course of study or research; (3) Awards made from the Sandra Garvie Memorial Fund do not exclude application for funds from other sources. Applicants may consider the Sandra Garvie Memorial Fund as a source of funds for a portion of a larger project for which the applicant has applied or received funding from other sources; (4) Awards will not normally be applicable to capital expenditures; (5) Awards for a course of study will be tenable at any post-secondary institution in Canada recognized by the Board as suitable for the pursuit of the proposed study; (6) No awards will be granted if no suitable candidates apply; (7) All decisions concerning the granting of awards will be at the total discretion of the Board of Directors. **Donor:** From a trust fund created in honor of the late Sandra Garvie. **Apply:** Applicants are requested to submit a research proposal, or proposed course of study, including a budget proposal, by 30 June 1984 to: Sandra Garvie Memorial Fund, c/o Lois E. Gander, Director, Legal Resource Centre, 10049 81 Avenue, Edmonton, Alberta T6E 1W7.

Leukemia Society of America

The Leukemia Society of America, a national voluntary agency, is accepting applications for 1985 grants to support research in the fields of leukemia and related diseases. The grants are intended to encourage studies at both the basic science and clinical levels.

As an important source of funding for individuals whose work is concentrated on finding the cause or causes and eventual cure for leukemia, lymphomas, Hodgkin's disease and multiple myeloma, the Society offers three awards.

Five-year scholarships for a total of \$135,000 are available for researchers who have demonstrated their ability to conduct original investigations in the specified fields. Two-year special fellowships and fellowships, for \$41,000 and \$34,000, respectively, are offered for those in the intermediate and entry states of career development.

In all categories, candidates may not have attained the tenured status of associate professor.

Awards will not be made for pre-doctoral training.

Deadline for filing applications is 1 September 1984. Only one application in each grant category from an individual sponsor will be considered. Project proposals will be evaluated on a competitive basis by the Society's medical and scientific advisory committee next January with funding to start 1 July 1985.

For application forms and further information, write to Research Grant Program, Leukemia Society of America, 800 Second Avenue, New York, New York 10017.

Positions Vacant

The University of Alberta is an equal opportunity employer but, in accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Student Housing Officer

The Department of Housing and Food Services provides residence and housing facilities for more than 3,000 students at one of Canada's largest universities. Our department operates under a philosophy of providing a residential environment which enhances academic life while also operating within a mandate to break-even financially.

We are seeking an experienced, innovative, team-oriented Student Housing Officer who will be responsible for effectively managing a day-to-day operation that provides comfort and secure accommodation to students in six major housing complexes. You will initiate and maintain housing policies and procedures while managing occupancy, security, maintenance and special projects. You will also actively liaise with student/tenant groups, resident deans, departmental managers and other University administrators. The position reports to the Director of Housing and Food Services and supervises a support staff of approximately 80 people and manages a \$7,671,000 yearly operating budget.

Qualified applicants must have a minimum of three years' related experience, preferably in a large academic institution. A bachelor's degree in a related field is required.

Salary range: \$28,740-\$43,100 per annum commensurate with experience. The University offers a comprehensive benefits package, including one month annual vacation.

This position is currently under review.

Please submit a comprehensive résumé to: David Bruch, 41 Lister Hall, University of Alberta, Edmonton, Alberta T6G 2H6.

Assistants to the Dean of Students in Residence (Part-time Positions)

Assistants to the Dean of Students in Residence reside in the Lister Hall complex.

They represent the University Administration in the conduct of Student Affairs within the Residence by serving as Advisors to the student government and seeing to the general welfare of students residing in the Hall.

They report to the Dean of Students, and are responsible for discipline and the improvement of residence life within that Hall.

Applicants should have some experience in student affairs, counselling, or some other aspect of University Administration.

Further information can be obtained by contacting the Assistant Dean in Residence-Coordinator at 432-2958 during office hours.

Starting date: 1 September 1984.

Résumé and curriculum vitae should be sent to: Assistant to the Dean in Residence-Coordinator, c/o Int'l. Briefing Centre, 132 Athabasca Hall, University of Alberta, Edmonton, Alberta T6G 2E8.

Statistics and Applied Probability

The Department of Statistics and Applied Probability invites applications for two positions at the Assistant Professor level.

1. A limited term (8 months) position in any area of statistics or probability, effective 1 September 1984. The appointment will be made subject to funds being available. Closing date: 15 August 1984.

2. A tenure-track appointment in any area of statistics or probability, effective 1 July 1985. Rank: Assistant Professor; Salary range: \$29,720 to \$41,820 per annum. Closing date: 1 December 1984.

Interested individuals should send a curriculum vitae to: Dr. J.R. McGregor, Department of Statistics and Applied Probability, University of Alberta, Edmonton, Alberta T6G 2G1.

Non-Academic Positions

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Due to publication lead time and the fact that positions are filled on an on-going basis, these vacancies cannot be guaranteed beyond 15 June 1984. For a more up-to-date listing, please consult the weekly Employment Opportunities Bulletin and/or the postings in PSSSR.
